Why Aluminum...

With the world's forests being destroyed by the second, and the push to be environmentally green, aluminum is one of the worlds best sustainable building products.

Aluminum is 100% recyclable allowing it to be re-used over and over again, which means it's not a burden on landfills. The superior strength and non-corrosive properties make it a resilient long lasting building material. Aluminum is the product of choice when it comes to durability and longevity, hence its heavy use in the aircraft industry.

Property owners, and contractors alike both agree, aluminum is a win-win choice for both parties.

No scraping or peeling means low maintenance and low cost of ownership. The T-6063 aluminum alloy gives Contractor Building Products a superior strength which allows the product to be used from ground floor structures to high-rise balconies with confidence. The ease of use along with a friendly assembly ensure a durable and long lasting finished product. Additionally, aluminum is fire resistant, does not chalk like its vinyl counterparts, does not discolor like hard plastic, does not become brittle, does not rot or deteriorate like wood and cleans with soap and water.

Make an investment in your property and our world; move to the greener alternative, Aluminum!

Aluminum 1" Square Baluster Railing

Premium Quality, Competitively Priced...

Contractor Railing is the preferred railing system among professional contractors and property owners alike.

The superior pre-finished strength of aluminum has numerous advantages over wood, steel, or vinyl. Quick assembly of the pre-punched aluminum extrusions allows this remarkable product to assemble and/or retro fit an existing or new project with ease. Our unique no weld system allows you to mechanically assemble a finished product the first time, thus reducing labor costs.

Contractor Railing boasts a superior powder coat finish and lifetime structural warranty.

You'll enjoy sitting on your deck or patio knowing you're protected by the strength of Contractor Handrail.

Residential & Commercial Baluster Features

- Convenient 6' & 8' Kits Available
- Cuts to size using common tools
- 24' Extrusions Available
- 36" & 42" Heights Available (custom sizes available)
- Matching Post Kits Available
- Powder Coat Finish
- 10 Year Finish Warranty
- Lifetime Structural Warranty
- Professionally Engineered & IBC Compliant

Aluminum Baluster Railing Accessories

Angled Post & Stair Mounts

Quick, clean way to create a stair angle. Works well on ramps too. The same bracket will allow you to achieve side to side angles by flipping the pivot pin.

Fixed Post Mounts

Fixed post mounts are used for level runs. All Contractor Handrail kits come with 2 top and 2 bottom post mounts.

Pre-Built Gates

Available in residential 36" wide (36" tall railing), commercial 36" wide (42" tall railing), Gravity latch and standard hinges included.

Optional self-closing hinges and lockable pool latch available

Sizes: 36x36, 36x42, and Custom

Specialty Fasteners

- Color Matched Stainless Steel

Stainless steel fastener upgrades are available for applications in corrosive salt spray environments.

Standard kits contain color-matched zinc fasteners.

- White
- Bronze
- Desert Tan

- Hammered Black
- Custom Colors

Aluminum Railing: Glass Panel

Contractor Glass Panel or Baluster Railing is a unique way to enhance your outdoor living space. The Glass Railing System is a simple assembly with jaw dropping results. The pre-engineered system uses aluminum with tempered glass to achieve an unparalleled glass railing. Combine this railing with traditional 1" square baluster railing, or stand alone for a rich unobstructed view.

8 in. baluster is available in residential, or commercial heights. See page 8 for glass baluster info and photos

Waterproof Under-Deck Ceilings

Waterproof under deck ceilings are a great way to finish and complete the ceiling of your decking project. The Contractor Dry Deck Systems are tailor made to meet your exact deck specifications. Manufacturing to your decks dimensions eliminates wasted material saving you and your customer time and money.

Contractor Dry Decks Systems also support most ceiling mounted electrical components, such as lights and ceiling fans.

Take a look at some of these additional great features:

Dry Deck Features:

- Most orders ship in 24 hours
- 100% Aluminum alloy keeps it shape year after year unlike vinyl products that warp from expansion and contraction
- Smooth Bright White, Satin White Stucco, and Tan Wood grain finishes available
- Eliminates the moldy musty feel below your deck by directing rain and snow to proper drainage locations
- Compatible with traditional K-style 5" and 6" home gutters - not included.
- No Maintenance Polyester Paint Finish with a 10-year factory warranty
- Up to 27' lengths available
- Compatible with most existing & new build cantilever or low beam decks

Patio Enclosure Systems

Madden Screen Enclosure Systems...

Ever wished you could increase your usable living space? Now you can with the help of Madden Industries Screen Enclosure Systems. Build the outdoor environment of your dreams, and the envy of your neighbors. Our systems are constructed of maintenance free aluminum with an industrial grade powder coat finish. When you buy a Madden Industries system, we provide you a simple easy to understand layout tailored for your specific openings. Our layouts eliminate the guessing game of what component goes where. Our unmatched customer service is always available for any challenges that may arise too. A screen enclosure from Madden Industries will stop mother nature in her tracks, for a grade A system, give us a call.

We offer custom single and double doors too, call or visit our website for more details.

Screen Enclosure Features
